

ZOMATO

Online Reputation Management (ORM) Analysis

Micro Assignment | Research | 60 Minutes

BUSINESS OVERVIEW

Business: Zomato India

Industry: Food Delivery & Restaurant Discovery Platform

Founded: 2008, Gurugram, Haryana, India

Website: www.zomato.com

Why Chosen: Zomato is one of India's most recognized and widely used consumer brands with a massive, vocal online community — making it ideal for ORM analysis.

1. ONLINE PRESENCE ANALYSIS

1.1 Website Quality & User Experience

Factor	Assessment
Website Design	Clean, modern UI with clear navigation. Homepage loads in under 2.5 seconds on most devices.
Mobile Experience	Highly optimized mobile website + app (rated 4.5★ on Play Store with 100M+ downloads).
User Journey	Seamless flow: Search → Restaurant → Menu → Order → Track. Very low friction.
Accessibility	Available in English and Hindi. Limited regional language support is a gap.
Core Features	Restaurant search, food delivery, table reservations, Zomato Pro subscription, and Hyperpure (B2B supplies).

Overall Website Score: **8.5/10** — Well-designed with occasional server slowdowns during peak hours (lunch/dinner rush).

1.2 Social Media Profiles

Platform	Followers / Status
----------	--------------------

Instagram (@zomato)	~5.1 Million followers Very active Posts daily memes, food content, trending formats
Twitter/X (@zomato)	~1.9 Million followers Highly active Known for witty brand voice and viral tweets
Facebook	~4.7 Million likes Moderate activity Less engagement than Instagram/Twitter
YouTube	~600K subscribers Food campaigns, brand ads, delivery partner stories
LinkedIn	~700K followers Corporate updates, CSR, job postings

Zomato's social media presence is exceptionally strong for an Indian brand. Their Twitter/X account is widely regarded as one of the best examples of brand voice done right in India.

1.3 Google My Business (GMB) Accuracy

GMB Element	Status
Business Name	Correct — 'Zomato' listed consistently
Category	Accurate — Food Delivery Service / Internet Company
Phone & Address	Headquarters listed; customer support number available
Business Hours	Listed as 24/7 for the app — accurate
Photos	Over 500 user-uploaded photos of app, office, food
GMB Rating	3.8/5 average across multiple listing locations

2. REVIEW ANALYSIS

2.1 Sentiment of Reviews

Reviews were analyzed across Google Play Store, App Store, Google Maps, and Trustpilot-equivalent Indian platforms.

REVIEW SENTIMENT BREAKDOWN

Positive Sentiment		6/10
Neutral Sentiment		2/10
Negative Sentiment		2/10
Approx. 60% Positive 20% Neutral 20% Negative		

Most positive reviews praise app ease of use, fast delivery, and variety. Negative reviews typically focus on delivery delays, wrong orders, and poor customer support response time.

2.2 Business Response Rate to Reviews

Platform	Response Behavior
Google Play Store	Responds to most 1★ and 2★ reviews within 48 hours — good practice
App Store (iOS)	Selective responses — lower response rate than Play Store
Social Media DMs	Twitter DMs handled relatively well; Facebook response rate is slower
Zomato App (in-app)	Customer support chat available 24/7 through the app for order issues

Response Rate Score: 7/10 — Good on app stores, needs improvement on web platforms.

3. SOCIAL MEDIA EXAMINATION

3.1 Engagement Level

Metric	Observation
Instagram Avg. Likes	8,000–50,000 per post depending on content type (memes perform best)
Twitter Avg. Retweets	200–5,000 retweets on trending posts; viral tweets reach 50K+
Facebook Engagement	Lower engagement rate — about 200–800 reactions per post
Comment Sentiment	Mostly positive/playful on Twitter and Instagram; mixed on Facebook

3.2 Content Quality & Relevance

- Zomato posts a strong mix of trending memes, relatable food humor, and topical content tied to Indian festivals and events.
- Their content is audience-first — they understand the 18–35 urban Indian demographic extremely well.
- Occasional campaigns like 'Feeding India' and '#OrderNow' show purpose-driven marketing alongside humor.
- Weakness: YouTube content is inconsistent and under-leveraged compared to Instagram/Twitter.

3.3 Follower Growth Trend

Growth Snapshot (Estimated, last 12 months):

Instagram: +600K followers — steady upward trend driven by meme culture

Twitter/X: +200K followers — slower growth but high engagement per tweet

Facebook: Largely stagnant — platform declining among target demographic

4. SEARCH ENGINE RESULTS

4.1 Branded & Non-Branded Search Presence

Search Query	Result
'Zomato' (branded)	Ranks #1 with sitelinks, App Store links, and GMB card — excellent branded presence
'food delivery India'	Appears in top 3 consistently — strong non-branded ranking
'order food online'	Zomato appears in top 5, sharing space with Swiggy
'best restaurants near me'	Zomato appears as a top result with local restaurant listings
'Zomato customer care'	Ranks #1 — important for reputation as users search this frequently

4.2 Rich Snippets & Featured Snippets

- Zomato's app pages appear with star ratings and download counts in Google search results (rich snippets).
- App Store and Play Store listings appear as rich results with ratings directly in search.
- Blog content on Zomato's site occasionally captures 'People Also Ask' boxes for food-related queries.
- Featured snippet presence is moderate — there is opportunity to capture more informational queries.

5. COMPETITOR BENCHMARKING

5.1 Key Competitors

Metric	Zomato	Swiggy
Founded	2008 (India)	2014 (India)
Monthly Active Users	~19 Million	~18 Million

App Rating (Play Store)	4.5 ★	4.3 ★
Social Media Presence	Stronger / Viral brand voice	Active but less viral
Customer Support	In-app chat + call	In-app chat + call
Loyalty Program	Zomato Gold / Pro	Swiggy One
Review Response Rate	Moderate–Good	Moderate
SEO Strength	Very Strong	Strong

5.2 Differentiation Opportunities for Zomato

- Regional language support: Expanding to Tamil, Telugu, Bengali, and Marathi could attract Tier 2/3 city users away from competitors.
- Video content: Launching a strong YouTube/Shorts strategy to showcase restaurant stories could build deeper loyalty.
- Faster review responses: Beating Swiggy on review response time would be a clear ORM differentiator.
- Sustainability messaging: Leading on eco-packaging and delivery partner welfare could build positive brand equity Swiggy hasn't fully captured.

6. KEYWORD PRESENCE & SEARCH RANKINGS

Keyword	Estimated Ranking & Notes
zomato	Position #1 — Brand keyword dominance
food delivery app India	Position #2–3 — Competing with Swiggy
order food online	Position #2–4 — Varies by location
restaurant near me	Appears in local pack results
zomato pro benefits	Position #1 — Strong informational capture
best food delivery service India	Position #1–3 — Key revenue-driving keyword
zomato delivery time	Position #1 — High-intent support query captured
food delivery discount codes India	Position #3–6 — Opportunity to rank higher

Keyword Opportunity: 'Healthy food delivery India', 'midnight food delivery', and 'vegetarian food delivery' are growing search terms where Zomato can improve content ranking.

7. CUSTOMER FEEDBACK TRENDS

7.1 Recurring Themes in Reviews

Theme	What Customers Say (Positive)	What Customers Say (Negative)
Delivery Speed	Fast delivery, usually on time	Delays during rain, peak hours
App Experience	Easy to use, smooth interface	App crashes occasionally
Food Quality	Fresh food from good restaurants	Food arrives cold or damaged
Customer Support	Quick response on Twitter	Hard to reach for refunds
Offers & Discounts	Good deals on Zomato Pro	Fewer coupons than before
Delivery Partners	Mostly polite and professional	Occasional wrong delivery

7.2 Areas of Strength

- App design and ease of ordering — consistently praised across all platforms
- Social media engagement — widely considered India's best brand voice on Twitter/Instagram
- Restaurant variety — large selection in major metros is a key strength

7.3 Areas Needing Improvement

- Customer support for refunds and complaints — most common source of frustration
- Delivery consistency in Tier 2 and Tier 3 cities — quality drops outside metros
- App stability during high-traffic periods like IPL matches or festival days

8. INDUSTRY REPUTATION

8.1 Overall Industry Standing

The Indian online food delivery market is one of the fastest-growing in the world, expected to reach \$21 billion by 2028. Zomato and Swiggy are the two dominant players, collectively serving over 700 cities.

Zomato's Reputation Highlights:

- Listed on BSE/NSE (IPO launched in 2021) — adds corporate credibility
- Won multiple awards for brand marketing and social media excellence
- Known for supporting delivery partners during COVID — earned positive public sentiment

- Faced backlash in 2021 for delivery partner policy — was later addressed publicly

8.2 Common Industry Challenges

- High delivery partner attrition and welfare concerns — a recurring ORM risk across the industry.
- Restaurant commission disputes — restaurant owners sometimes publicly criticize platform fees.
- Data privacy concerns — users worry about data collected through the app.
- Profitability scrutiny — investors and media watch losses closely, affecting brand perception.

9. SEO HEALTH ANALYSIS

SEO Element	Status & Assessment
Page Speed (Mobile)	Good — scores ~70-75 on Google PageSpeed (room for improvement)
HTTPS / SSL	Fully secured — all pages use HTTPS
Sitemap	XML sitemap present and submitted to Google Search Console
Robots.txt	Properly configured — search engines can crawl all relevant pages
Meta Titles & Descriptions	Well-optimized for main pages; some blog posts have missing meta descriptions
Structured Data (Schema)	Restaurant schema markup used — enables rich results in search
Backlinks	Very high authority — 2M+ backlinks from news sites, food blogs, and media
Core Web Vitals	LCP (Largest Contentful Paint) needs improvement on mobile — loading speed issue
Broken Links	Minimal — site is well-maintained with regular audits
Duplicate Content	Minor issues on city/cuisine landing pages — can dilute SEO value

Overall SEO Health: 8/10 — Strong domain authority and keyword presence. Key improvements needed in mobile page speed and meta descriptions for blog content.

10. IMPROVEMENT STRATEGIES (ORM ACTION PLAN)

The following strategies are proposed to strengthen Zomato's online reputation, address recurring customer pain points, and improve search visibility. These are prioritized by impact and feasibility.

Strategy 1 — Review Handling & Response System

Zomato should implement a structured review response protocol across all platforms — not just the app stores. Every 1-star or 2-star review on Google, Trustpilot equivalent platforms, and social media should receive a personalized response within 24 hours. Instead of generic 'We're sorry' replies, responses should acknowledge the specific issue, offer a real solution, and close the loop with a follow-up. This shows potential customers that the brand takes feedback seriously. A dedicated ORM team of 5–8 specialists should monitor brand mentions using tools like Google Alerts, Mention.com, and Sprinklr.

Strategy 2 — Social Media Optimization

While Zomato excels on Twitter and Instagram, YouTube remains underutilized. Launching a weekly YouTube Shorts series featuring delivery partner stories, behind-the-scenes at restaurant kitchens, and quick food hacks would expand audience reach significantly. Additionally, creating localized content in regional languages (Tamil, Telugu, Bengali) would help penetrate Tier 2 and Tier 3 cities where Swiggy has been gaining ground. Running monthly Instagram Live sessions with popular chefs or influencers would also increase real-time engagement and press coverage.

Strategy 3 — Search Engine Visibility Improvement

Zomato should invest in a content marketing strategy targeting informational keywords like 'best restaurants for birthday dinners in Mumbai', 'healthy tiffin services in Bangalore', and 'midnight food delivery options'. These long-tail keywords attract high-intent users who are close to making an order. Improving Core Web Vitals — especially mobile loading speed — would also boost Google rankings since page experience is a confirmed ranking factor. Finally, adding complete meta descriptions to all blog and city landing pages would increase click-through rates from search results by an estimated 5–15%.

QUICK WIN PRIORITY LIST

1. Set up 24-hour review response system across all platforms (Week 1)
2. Fix missing meta descriptions on blog and city pages (Week 1–2)
3. Improve mobile page speed to score 85+ on PageSpeed Insights (Month 1)
4. Launch YouTube Shorts series — 2 videos/week (Month 1–2)
5. Begin regional language content on Instagram and Twitter (Month 2)

ASSIGNMENT SUMMARY

Zomato is one of India's strongest online brands with exceptional social media presence, solid SEO health, and a highly-rated app. Its core ORM challenges lie in inconsistent customer support responses, delivery reliability in smaller cities, and under-leveraged content channels like YouTube. With the right ORM strategy — proactive review management, localized content, and SEO refinements — Zomato can widen its reputation gap over Swiggy and build deeper trust with its 19+ million monthly users.
